International Journal of Mass Spectrometry 201 (2000) 339–342

International Journal of Mass Spectrometry

Subject index

Ab initio
Ab initio calculated gas-phase basicities of polynuclear aromatic hydrocarbons, 283
Ab initio spectroscopic properties for $HgTl^+$, 17
Ab initio study of Ar_n-HCO^+ (n = 0–6): insight into size dependent cluster ion properties, 121
Collisional activation, neutralisation-reionisation, and computational studies of $[Ge,C,H_n]^{O/+}$, n = 2,3, 23
Mediators for hydrogenation of carbon monoxide: theoretical study of addition of H_2 to HCO^+ in the presence of CO or H_2O, 179
Spin-forbidden F^+ transfer between $^2NF^+$ and CO: a computational study on the detailed mechanistic aspects, 151
Structures and fragmentations of zinc (II) complexes of amino acids in the gas phase. I. Electrosprayed ions which are structurally different from their liquid phase precursors, 307
Theoretical study of hydrogen exchange in the reaction of $FeC_5H_6^+$ with H_2, 143

Anions, dipole
Bi-dipole-bound anions, 245

Antiaromaticity
The gas-phase acidity of cyclopropene and simple alkyl derivatives: Can they be measured?, 101

Ar_n-HCO^+
Ab initio study of Ar_n-HCO^+ (n = 0–6): insight into size dependent cluster ion properties, 121

Aryne
Systematic comparison of the benzynes, pyridynes, and pyridynium cations and characterization of the Bergman cyclization of Z-but-1-en-3-yn-1-yl isonitrile to the meta diradical 2,4-pyridyne, 1

Binding enthalpies
A study of complexes $Mg(NH_3)_n^{+\cdot}$ and $Ag(NH_3)_n^+$, where n = 1–8: Competition between direct coordination and solvation through hydrogen bonding, 87

Biradical
Systematic comparison of the benzynes, pyridynes, and pyridynium cations and characterization of the Bergman cyclization of Z-but-1-en-3-yn-1-yl isonitrile to the meta diradical 2,4-pyridyne, 1

B3LYP
Density functional theory predictions for the binding of transition metal cations to pi systems: from acetylene to coronene and tribenzocyclyne, 253

Carbon cluster anion
Radiative electron attachment to small linear carbon clusters and its significance for the chemistry of diffuse interstellar clouds, 135

$CF_2^{+\,+}$
Heat of formation of the $CF_2^{+\,+}$ dication: a theoretical estimate, 269

Collision-induced dissociation
A study of complexes $Mg(NH_3)_n^{+\cdot}$ and $Ag(NH_3)_n^+$, where n = 1–8: Competition between direct coordination and solvation through hydrogen bonding, 87

Conformers
Structures and reactivity of gaseous glycine and its derivatives, 69

Coordination numbers
A study of complexes $Mg(NH_3)_n^{+\cdot}$ and $Ag(NH_3)_n^+$, where n = 1–8: Competition between direct coordination and solvation through hydrogen bonding, 87

Coupled cluster calculations
Coupled cluster calculations for the S_N2 reaction $Cl^- + CH_3Br \rightarrow ClCH_3 + Br^-$, 277
Heat of formation of the $CF_2^{+\,+}$ dication: a theoretical estimate, 269

Cu^+ reactivity trends
Cu^+ reactivity trends in sp, sp^2, and sp^3 nitrogen, phosphorus, and arsenic containing bases, 215

Cyclopentadienyl ring
Theoretical study of hydrogen exchange in the reaction of $FeC_5H_6^+$ with H_2, 143

Cyclopropenyl anions
The gas-phase acidity of cyclopropene and simple alkyl derivatives: Can they be measured?, 101

Density functional theory (DFT)
Cu^+ reactivity trends in sp, sp^2, and sp^3 nitrogen, phosphorus, and arsenic containing bases, 215

1387-3806/00/$20.00 © 2000 Elsevier Science B.V. All rights reserved
PII S1387-3806(00)00260-8

Density functional theory predictions for the binding of transition metal cations to pi systems: from acetylene to coronene and tribenzocyclyne, 253
Spin-forbidden F^+ transfer between $^2NF^+$ and CO: a computational study on the detailed mechanistic aspects, 151
Structural and electronic characterisation of the organometallic distonic ion $(C_6H_6)Fe^+(p\text{-}C_6H_4)^{\cdot}$, 297
Structures and reactivity of gaseous glycine and its derivatives, 69
A study of complexes $Mg(NH_3)_n^{+\cdot}$ and $Ag(NH_3)_n^+$, where n = 1–8: Competition between direct coordination and solvation through hydrogen bonding, 87

Dication
Heat of formation of the CF_2^{++} dication: a theoretical estimate, 269

Didehydroarene
Systematic comparison of the benzynes, pyridynes, and pyridynium cations and characterization of the Bergman cyclization of Z-but-1-en-3-yn-1-yl isonitrile to the meta diradical 2,4-pyridyne, 1

Distonic ions
Intramolecular hydrogen migrations in ionized aliphatic alcohols. Barton type and related rearrangements, 161
Structural and electronic characterisation of the organometallic distonic ion $(C_6H_6)Fe^+(p\text{-}C_6H_4)^{\cdot}$, 297

Electron affinity
Structural changes induced by an excess electron in small mercury clusters, 197

Electronic structure binding energies
Theoretical study of cation/ether complexes: 15-crown-5 and its alkali metal complexes, 41

Electron impact ionization
Electron-impact total ionization cross sections of SF_x(x = 1–5), 187

Electrospray
Structures and fragmentations of zinc (II) complexes of amino acids in the gas phase. I. Electrosprayed ions which are structurally different from their liquid phase precursors, 307
A study of complexes $Mg(NH_3)_n^{+\cdot}$ and $Ag(NH_3)_n^+$, where n = 1–8: Competition between direct coordination and solvation through hydrogen bonding, 87

Enediyne cyclization
Systematic comparison of the benzynes, pyridynes, and pyridynium cations and characterization of the Bergman cyclization of Z-but-1-en-3-yn-1-yl isonitrile to the meta diradical 2,4-pyridyne, 1

Energy transfer pathways
Energy transfer pathways in the collisional activation of peptides, 233

Exchange reactions
Formation of three-membered phosphorus heterocycles via ligand-exchange reactions in mono-adducts of the phosphenium ion: an ab initio investigation, 205

$FeC_5H_6^+$
Theoretical study of hydrogen exchange in the reaction of $FeC_5H_6^+$ with H_2, 143

Fluorine
Spin-forbidden F^+ transfer between $^2NF^+$ and CO: a computational study on the detailed mechanistic aspects, 151

Fragmentation
Structures and reactivity of gaseous glycine and its derivatives, 69

Fragmentation patterns
Radical cations of DNA bases: some insights on structure and fragmentation patterns by density functional methods, 321

F^+ transfer
Spin-forbidden F^+ transfer between $^2NF^+$ and CO: a computational study on the detailed mechanistic aspects, 151

Gas-phase basicity
Ab initio calculated gas-phase basicities of polynuclear aromatic hydrocarbons, 283

Gas phase ion chemistry
Mediators for hydrogenation of carbon monoxide: theoretical study of addition of H_2 to HCO^+ in the presence of CO or H_2O 179

Glycine
Structures and fragmentations of zinc (II) complexes of amino acids in the gas phase. I. Electrosprayed ions which are structurally different from their liquid phase precursors, 307

G2 theory
Formation of three-membered phosphorus heterocycles via ligand-exchange reactions in mono-adducts of the phosphenium ion: an ab initio investigation, 205
The gas-phase acidity of cyclopropene and simple alkyl derivatives: Can they be measured?, 101

HCO^+
Ab initio study of Ar_n-HCO^+ (n = 0–6): insight into size dependent cluster ion properties, 121

H/D exchange
Structures and reactivity of gaseous glycine and its derivatives, 69

H_2 exchange
Theoretical study of hydrogen exchange in the reaction of $FeC_5H_6^+$ with H_2, 143

Hybrid model
Structural changes induced by an excess electron in small mercury clusters, 197
Hydrogenation
Mediators for hydrogenation of carbon monoxide: theoretical study of addition of H_2 to HCO^+ in the presence of CO or H_2O, 179
Hydrogen migrations
Intramolecular hydrogen migrations in ionized aliphatic alcohols. Barton type and related rearrangements, 161

Interstellar clouds
Radiative electron attachment to small linear carbon clusters and its significance for the chemistry of diffuse interstellar clouds, 135
Iodopropane
Unimolecular reaction dynamics from kinetic energy release distributions. VI. Energy-selected ions, 59
Ion cyclotron resonance
The gas-phase acidity of cyclopropene and simple alkyl derivatives: Can they be measured?, 101
Ion-dipole complexes
Coupled cluster calculations for the SN2 reaction $Cl^- + CH_3Br \rightarrow ClCH_3 + Br^-$, 277
Ionic clusters
Ab initio study of Ar_n-HCO^+ (n = 0–6): insight into size dependent cluster ion properties, 121
Ionization cross section
Electron-impact total ionization cross sections of SF_x(x = 1–5), 187
Ionized alcohols
Intramolecular hydrogen migrations in ionized aliphatic alcohols. Barton type and related rearrangements, 161
Iron complex
Theoretical study of hydrogen exchange in the reaction of $FeC_5H_6^+$ with H_2, 143
Isomerization
Structures and fragmentations of zinc (II) complexes of amino acids in the gas phase. I. Electrosprayed ions which are structurally different from their liquid phase precursors, 307

Kinetic energy release
Unimolecular reaction dynamics from kinetic energy release distributions. VI. Energy-selected ions, 59
Kinetic method
The gas-phase acidity of cyclopropene and simple alkyl derivatives: Can they be measured?, 101

Mass spectrometry
Collisional activation, neutralisation-reionisation, and computational studies of $[Ge,C,H_n]^{O/+}$, n = 2,3, 23
Maximum entropy method
Unimolecular reaction dynamics from kinetic energy release distributions. VI. Energy-selected ions, 59
Mercury clusters
Structural changes induced by an excess electron in small mercury clusters, 197
Metal Pi bonding
Density functional theory predictions for the binding of transition metal cations to pi systems: from acetylene to coronene and tribenzocyclyne, 253
Mono-adducts of the phosphenium ion
Formation of three-membered phosphorus heterocycles via ligand-exchange reactions in mono-adducts of the phosphenium ion: an ab initio investigation, 205
α2(MP2, SVP) molecular orbital calculations
Intramolecular hydrogen migrations in ionized aliphatic alcohols. Barton type and related rearrangements, 161

N^+ (coronene)
Density functional theory predictions for the binding of transition metal cations to pi systems: from acetylene to coronene and tribenzocyclyne, 253
Nitrogen
Cu^+ reactivity trends in sp, sp^2, and sp^3 nitrogen, phosphorus, and arsenic containing bases, 215

Organogermanium ions
Collisional activation, neutralisation-reionisation, and computational studies of $[Ge,C,H_n]^{O/+}$, n = 2,3, 23
Organometallic
Structural and electronic characterisation of the organometallic distonic ion $(C_6H_6)Fe^+(p\text{-}C_6H_4)^{\cdot}$, 297

Peptides
Energy transfer pathways in the collisional activation of peptides, 233
Phase space sampling
Unimolecular reaction dynamics from kinetic energy release distributions. VI. Energy-selected ions, 59
Phosphorus and arsenic bases
Cu^+ reactivity trends in sp, sp^2, and sp^3 nitrogen, phosphorus, and arsenic containing bases, 215
Polynuclear aromatic hydrocarbons
Ab initio calculated gas-phase basicities of polynuclear aromatic hydrocarbons, 283
Potential energy profiles
Structures and reactivity of gaseous glycine and its derivatives, 69
Predissociation dynamics
Spin-orbit induced predissociation dynamics of HCl^+ and HBr^+ ions: temporal and spectral representations, 109
Predissociation spectra

Spin-orbit induced predissociation dynamics of HCl^+ and HBr^+ ions: temporal and spectral representations, 109
Proton affinity
Ab initio calculated gas-phase basicities of polynuclear aromatic hydrocarbons, 283
Protonated glycine
Structures and reactivity of gaseous glycine and its derivatives, 69
Proton imigration
Structures and reactivity of gaseous glycine and its derivatives, 69
Proton transfer
Ab initio calculated gas-phase basicities of polynuclear aromatic hydrocarbons, 283

Quantum chemistry M^+(TBC)
Density functional theory predictions for the binding of transition metal cations to pi systems: from acetylene to coronene and tribenzocyclyne, 253

Radiative electron attachment
Radiative electron attachment to small linear carbon clusters and its significance for the chemistry of diffuse interstellar clouds, 135
Radical cations
Radical cations of DNA bases: some insights on structure and fragmentation patterns by density functional methods, 321

Selected-ion flow tube
A study of complexes $Mg(NH_3)_n^{+\cdot}$ and $Ag(NH_3)_n^+$, where n = 1–8: Competition between direct coordination and solvation through hydrogen bonding, 87
SF_6 Theory
Electron-impact total ionization cross sections of SF_x(x = 1–5), 187
Singlet-triplet splitting
Systematic comparison of the benzynes, pyridynes, and pyridynium cations and characterization of the Bergman cyclization of Z-but-1-en-3-yn-1-yl isonitrile to the meta diradical 2,4-pyridyne, 1
Spectroscopic constants
Ab initio spectroscopic properties for $HgTl^+$, 17
Spin-forbidden
Spin-forbidden F^+ transfer between $^2NF^+$ and CO: a computational study on the detailed mechanistic aspects, 151
SN2 reactions
Coupled cluster calculations for the SN2 reaction $Cl^- + CH_3Br \rightarrow ClCH_3 + Br^-$, 277
Statistical theory
Unimolecular reaction dynamics from kinetic energy release distributions. VI. Energy-selected ions, 59
Sulfur fluorides
Electron-impact total ionization cross sections of SF_x(x = 1–5), 187

Three-membered heterocyclic ions
Formation of three-membered phosphorus heterocycles via ligand-exchange reactions in mono-adducts of the phosphenium ion: an ab initio investigation, 205

Van der Waals
Ab initio spectroscopic properties for $HgTl^+$, 17

Wave packet analysis
Spin-orbit induced predissociation dynamics of HCl^+ and HBr^+ ions: temporal and spectral representations, 109

Zinc ions
Structures and fragmentations of zinc (II) complexes of amino acids in the gas phase. I. Electrosprayed ions which are structurally different from their liquid phase precursors, 307
